SERVICE INSTRUCTION

Shimano 105 Shifting Lever

SL-1050

NEW SHIMANO 105

Before use, read these instructions carefully, and follow them for correct use.

■Specifications

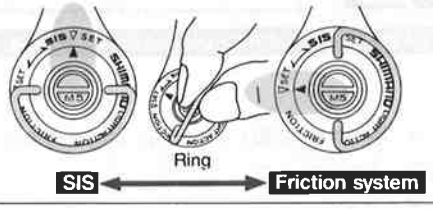

- Type: SIS type (6 speeds) with friction shifting mechanism
- Installation position; Down tube
- Material: Light alloy
- Weight: 71 g (brazed-on A type)

■Note

- The following products should be used together for the Shimano Index System (SIS) function.
  - Shifting Lever SL-1050/SL-6208
  - Rear Derailleur RD-1050/RD-6208
  - Freewheel (6 speeds) FH-1050/MF-Z012/FH-6208/MF-6208/FH-7400/MF-7400
  - Chain . . . . . Shimano UG Chain/SEDISPORT
  - Outer Cable . . . . . Shimano SIS cable
- Because the high cable resistance of a frame with internal cable guides would impair the SIS function, this type of frame should not be used.
- The shifting lever (SL-1050) and rear derailleur (RD-1050) cannot be used in combination with the DURA-ACE Series components to obtain SIS performance.

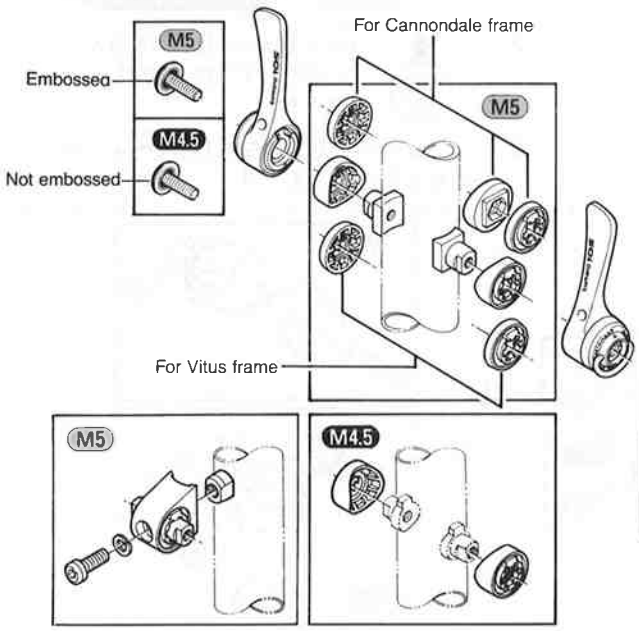

SIS operation

Turn the ring to change to SIS or friction.
Turn the ring all the way to the ▲SET position.

Installation of the shifting lever

Install the shifting lever while referring to the size (M5 size and M4.5 size) of the lever tightening bolt and lever boss. The same size of each should be used.

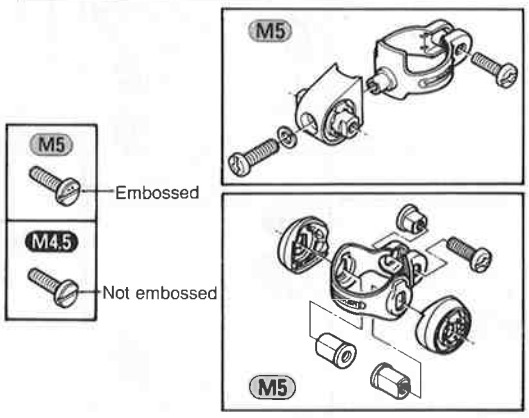

NOTE:

1) (–) screwdriver — **Lever fixing bolts (left/right) tightening torque: 25—30 kgfcm (23—28 in.lbs.)**

Lever fixing bolt

2) Place the lever boss cover so that the protruding part is facing in the direction of the head tube.

3) There are many types of lever boss covers available: for M4.5 (Shimano), for M5 (Italian) and Vitus/Cannondale aluminum flames.

Please note: Specifications are subject to change for improvement without notice. (English)
